

220W Photovoltaic module BP 3220T

BP Solar has been manufacturing solar wafers, cells and modules for more than 35 years. This experience shows that the best way to optimize module life and electrical energy production is to attend to every detail in the design and manufacture of our products, our process controls and testing methods. BP Solar's latest generation of 60 cell, Polycrystalline T Series solar modules offers the following benefits:

Long lasting, innovative frame design

The aluminum frame has a rounded profile for better handling comfort and is optimized for use with anti-theft bolts to increase security.

Flexible mounting and reduced soiling losses

Increased distance between cells and frame, and an enhanced design to push the laminate to the front, ensures that dirt accumulation will not shadow cells, even in landscape mounting, thus maximizing energy production.

Improved reliability with effective cooling

IntegraBus[™] technology ensures reliable cable management while positioning the bypass diodes and junction box away from the cells for cooler operation and greater energy production.

Environmentally responsible

Lead free soldering and interconnections, halogen free cables complete with latching MC4 connectors and minimal packaging waste.

Enhanced warranty offer

BP Solar launches an industry leading warranty offer, with lower degradation rates on our modules manufactured beginning January 1st, 2010. Our internal testing standards that go well beyond international requirements back this innovative offer.

220W Photovoltaic module

BP 3220T

Electrical characteristics

$^{(1)}STC$ 1000W/m ²	(2) NOCT 800W/m ²
220W	158W

Class A	
600V (U.S. NEC rating); 1000V (IEC 61730):2007)
	220W 28.9V 28.9V 76A 8.20A 36.6V 36.7V 37.7V 37.

1: Values at Standard Test Conditions (STC): 1000W/m² irradiance, AM1.5 solar spectrum and 25°C module temperature 2: Values at 800W/m² irradiance, Nominal Operation Cell Temperature (NOCT) and AM1.5 solar spectrum

3: Nominal Operation Cell Temperature: Module operation temperature at 800W/m² irradiance, 20°C air temperature, 1m/s wind speed

All solar modules are individually tested prior to shipment; an allowance is made within our factory measurement to account for the typical power degradation (LID effect) which occurs during the first few days of deployment.

Mechanical characteristics

Solar cells	60 polycrystalline 6" silicon cells (156x156mm) in series	
Front cover	High transmission 3.2mm (1/8th in) glass	
Encapsulant	EVA	
Back cover	White polyester	
Frame	Silver anodized aluminum (Universal II)	
Diodes	IntegraBus™ with 6 Schottky diodes	
Junction box	Potted (IP 67); certified to meet UL 1703 flammability test	
Output cables	4mm ² cable with latching MC4 connectors Asymetrical cable lengths: (-)1250mm (49.21in) / (+)800mm (31.50in)	
Dimensions	1667x1000x50mm / 65.6x39.4x2.0in	
Weight	19.4kg / 42.8lbs	
All dimensional tolerances within ±0.1% unless otherwise stated.		

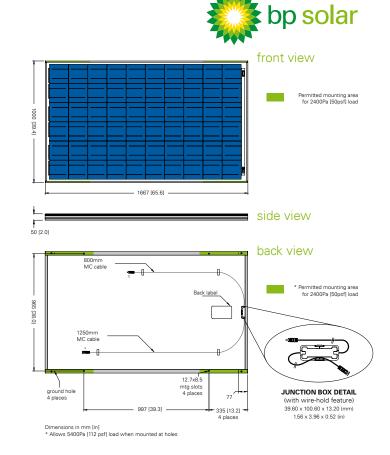

Warranty

- Free from defects in materials and workmanship for 5 years
- 93% power output over 12 years
- 85% power output over 25 years

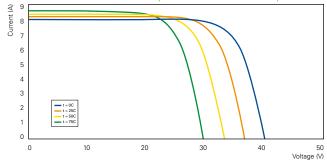

Certification

Certified according to the extended version of the IEC 61215:2005 (Crystalline silicon terrestrial photovoltaic modules - Design qualification and type approval) Certified according to IEC 61730-1 and IEC 61730-2. (Photovoltaic module safety qualification, requirements for construction and testing) Listed to UL 1703 Standard for Safety by Intertek ETL (Class C fire rating) Manufactured in ISO 9001 and ISO 14001 certified factories

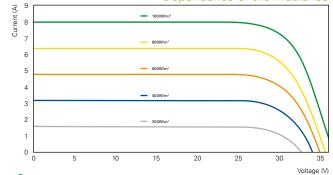

Module electrical measurements are calibrated to World radiometric reference via third party international laboratories

Dependence of the temperature

Dependence of the irradiance
